Profile

I am Meet Chaudhari, a third-year Computer Engineering student with strong skills in programming languages like C, C++, C# and JavaScript. I have hands-on experience working on various projects using different technologies. I am focused on improving my front-end and back-end development skills and can create responsive and dynamic websites. Additionally, I have a basic understanding of algorithms, and the projects I've mentioned are part of my academic work.

Projects

VinyVibe: E-commerce Website
This is Website project, which deliver a user-friendly e-commerce platform using HTML, CSS, and PHP to provide a seamless shopping experience. It integrates user authentication & authorization, product catalog, shopping cart, user profile and admin panel for managing database and add new product.

Hospital Management System
This is C++ project. It consists patient registration, appointment scheduling and record management. I had applied object-oriented programming for modularity, scalability, and easy maintenance.
